6–8 years	34	17:1	2	32	16:1	2	33	11:1	3	
9–13 years	34	17:1	2	32	16:1	2	33	11:1	3	

Scoring notes:

- For the 0-11 months and 12-17-month age groups, score of 1 is excluded as an allowable score. These age groups can only score 0, 2, or 3.
- A score of 0 is given if the classroom maximum group size, ratios and minimum caregivers are below the score of 1.
- For ratios that fall between the scores provided in the grid, the lower score would apply the classroom. For example, a 2-year-old group size of 21 with 2 caregivers at a 10.5:1 ratio would be a score of 0.

Note: The above measure, group sizes, and ratios apply to center and school based care only. The above do not apply to Licensed and Registered Childcare Homes.

Category 2: Caregiver-Child Interactions

GROUP SIZE / RATIOS

For reference, the center-based licensing standards for group size and ratios are provided below:

§746.1601 How many children may one caregiver supervise?

The classroom ratio is the number of children one caregiver may supervise and is shown in the following chart.

The classroom ratio is based on the specified age of the children in the group, unless otherwise stated in this subchapter:

If the specified age of the children in the group is	Then the maximum number of children one caregiver may supervise is
0 – 11 months	4
12 – 17 months	5
18 – 23 months	9
2 years	11
3 years	15
4 years	18
5 years	22
6-8 years	26
9-13 years	26

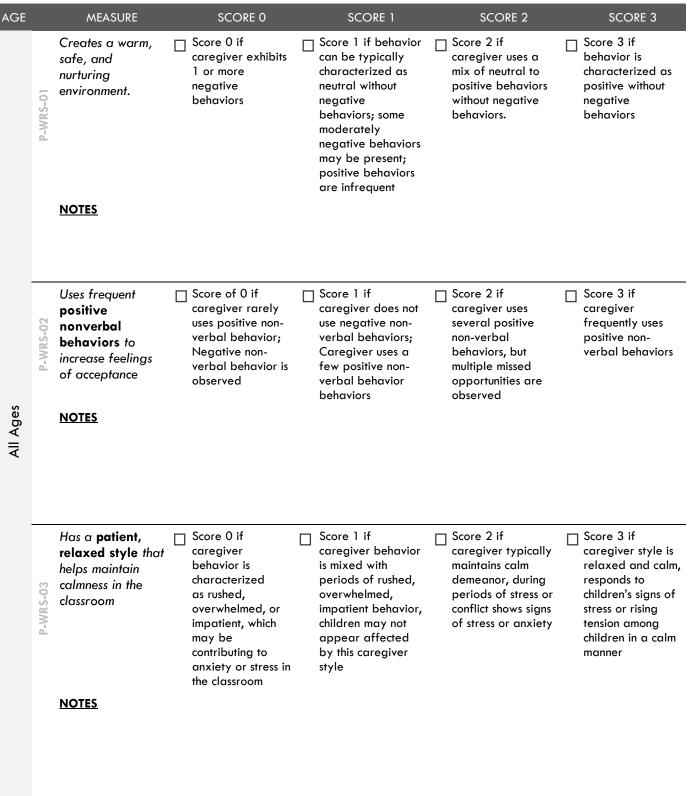

§746.1609 What is the maximum group size?

The maximum group size and the number of children two or more caregivers may supervise when 13 or more children are in care is specified in the following chart and is based on the specified age of the children in the group:

If the specified age of the children in the group is	Then the maximum group size and number of children two or more caregivers may supervise is
0 – 11 months	10
12 – 17 months	13
18 – 23 months	18
2 years	22
3 years	30
4 years	35
5 years	35
6-8 years	35
9 – 13 years	35

Toddler and Older	P-N-02	Caregivers model appropriate dining etiquette.	☐ Never	Rarely	Sometimes	☐ Often
Infants (0-12 months)	P-N-03	Infants are held (if developmentally appropriate) and talked to in reassuring tones while bottle fed. NOTES N/A is allowed if all infants in the classroom receive the majority of their nutrition from solid foods.	□ No evidence	Some infants were held during feeding but no positive speech directed at the infant was observed; score 0 if negative speech or handling was observed	All infants were held during bottle feeding. However, there was limited speech or reassuring tones observed; no negative speech or tone used	All infants were held during bottle feeding and were talked to in reassuring tones.

Category 4: Nutrition and Indoor / Outdoor Environment NUTRITION (points-based measures)

AGE	MEASURE	SCORE 0	SCORE 1	SCORE 2	SCORE 3
Infants (0-12 months)	Caregivers feed infants on the infant's cue, such as the infant opening the mouth and making suckling noises or moving hands at random, unless the parent and the child's physician give written instructions otherwise. The caregivers also stop feeding upon satiety. Caregivers observe satiation indicators such as the infant keeping the mouth closed, turning away from the bottle, and paying increased attention to surroundings	□ No evidence	Caregivers often use pacifiers when they observe some infant feeding cues. In some instances they begin feeding infants. Feeding is not consistently discontinued when there are signs of satiety.	□ Caregivers are patient and responsive when observing infant cues, and when observing signs of satiety. Pacifiers are rarely used in place of feeding when cues are observed. Feeding is regularly discontinued when infants turn away from the bottle, have increased awareness of surroundings, begin to close the mouth, or say "no".	As often as possible, the same caregiver works with the same infant and becomes familiar with his feeding cues. The caregivers are patient, gentle, and responsive to cues and signs of satiety. Pacifiers are not used in place of feeding when cues are presented.
Toddler, Preschool, and School-age	Meals are served to children seated with their assigned caregivers when not helping with the meal service routine or providing necessary assistance to children. Children are encouraged to sample a variety of food of different colors and textures. NOTES	□ No evidence	Meals are served to children in their assigned groups; caregivers join the children, but do not interact with the children or encourage the children to engage in conversation.	Meals are served to children in their assigned groups; caregivers join the children, and interact with the children or encourage the children to engage in conversation.	Caregivers are seated with children, they engage and encourage them. Meals are served to children in their assigned groups.

Category 4: Nutrition and Indoor / Outdoor Environment INDOOR LEARNING ENVIRONMENT (required measures)

AGE		MEASURE	NOTES	MET/NOT MET
All Ages	S-ILE-01	 Indoor environment is arranged to facilitate a distinct division of active and quiet spaces Nap/rest space is conducive for children to relax, rest or sleep as appropriate for the ages and abilities of children Indoor environment includes space where children can play protected from interference by other children, yet be supervised by the caregiver Equipment/materials are clean and in good repair. Providers supply a checklist of cleaning and maintenance tasks they use to ensure a safe and sanitary environment for children. Equipment/materials are readily available and adapted to allow for equal participation by al children 		□ MET □ NOT MET
Infants	S-ILE-02	 Indoor environment includes sufficient quantity of sleeping, diapering and feeding equipment to accommodate the number of children served Indoor environment includes sufficient space to allow for different kinds of experiences such as tummy time, active play, quiet play, and messy play Diapering areas include items that enhance cognitive and communication skills Indoor environment includes space and equipment where caregivers and mothers can sit comfortably and hold infants while feeding or breast feeding 		 MET NOT MET N∕A
School Age	S-ILE03	Indoor environment is arranged to include a quiet place with age appropriate tables, chairs and appropriate lighting to facilitate completion of homework .		MET NOT MET

Category 4: Nutrition and Indoor / Outdoor Environment INDOOR LEARNING ENVIRONMENT (points-based measures)

AGE		MEASURE	SCORE 0	SCORE 1	SCORE 2	,	SCORE 3
	P-ILE-01	Indoor environment is arranged to facilitate division of interest areas for play (as developmentally appropriate) and allow children to move easily from one area to another. For infants, a variety of stimulating opportunities for learning that may change throughout the day	No evidence of division of play space into interest areas or fewer than three areas are arranged.	At least three different kinds of interest areas with appropriate equipment/ materials and sufficient space that allows for active, quiet, and messy play areas.	Developmentally appropriate equipment/ materials arranged to facilitate play in 4 interest areas materials and sufficient space that allows for active, quiet, and messy play areas.		At least 5 interest areas arranged in the classroom which provide for Different kinds of learning experiences. Developmentally appropriate equipment/materials are arranged for independent use. Interest centers are routinely changed to add variety.
All Ages		<u>NOTES</u>					
	P-ILE-02	Equipment/ materials portray people in a manner that is non- stereotypical and culturally sensitive	No artifacts/ key indicators visible	1-2 types artifacts/key indicators visible	3-4 types artifacts/key indicators visible		5 types artifacts/ key indicators visible
